

9500-628 HD+

KEY FEATURES

Video Associates Labs, the leader in image acquisition systems for Photo ID applications announces the new VALCam 9500-628 HD+, our highest quality camera to date. Taking a step forward from our 9000-628 the HD+ offers 6x the resolution for true high definition performance. The new HD+ uses the finest optics available providing a 30-1 zoom ratio and unparalleled low light performance providing excellent results in the most unforgiving environments.

The increased resolution of the HD+ mimics the performance of digital SLR cameras for high-quality prints without restrictive zoom requirements. This increase in operational speed allows for a faster subject throughput. The HD+ offers resolution and cropping control to match the photo field of your ID design. On screen preview allows What You See Is What You Get.

Unlike other solutions that have limited LED capability, the HD+ has a built-in high powered Xenon flash to deliver consistent captures in any environment. Flash intensity is software controlled for easy and optimal illumination at various subject distances. Software options allow for extensive color balancing and quality adjustments.

When you purchase a VALCam, rest assured that we will stand behind our products. Our camera systems are built to be a long term solution for your Photo ID needs. After the warranty period, we will continue to offer tech support and service for the lifetime of the product. We also encourage all new customers to contact us for guidance during setup for training to ensure optimal image quality.

If you are looking for the highest quality camera in a reliable package, we suggest that you compare our product with any other camera system.

IMAGE QUALITY

- ▶ High-quality optics provide exceptional lowlight capabilities for excellent captures in the harshest, most unforgiving environments
- ▶ Powerful, high-intensity flash
- ▶ True high definition resolution
- ▶ Specific controls for fine-tuning flesh tones to achieve perfect image replication

OPERATIONAL EFFICIENCY

- ▶ Custom cropping option allows the preview of a captured image as it will appear on your ID card
- ▶ Auto Focus, 30-1 optical zoom
- ▶ Administrative lock on-camera controls to increase consistency in imaging
- ▶ Full optical zoom control from the mouse or keyboard

OPERATIONAL EASE

- ▶ Flash directly integrated with the camera, batteries not needed
- ▶ Integrated USB 2.0 or 3.0 interface
- ▶ Fast image transfer to software applications for speedy throughput
- ▶ Full-featured 32 and 64 bit SDK for custom development, includes lifetime support

SUPPORT

- ▶ 32 and 64 bit support for Windows 10, 8, 7, & Server editions
- ▶ Includes Twain driver, standalone application, flash, cables, and all connecting hardware
- ▶ Unlimited tech support
