AIPHONE®

IX Series 2

Redefining what one
IP intercom system can do.

Enterprise Power.
Aiphone Reliability.

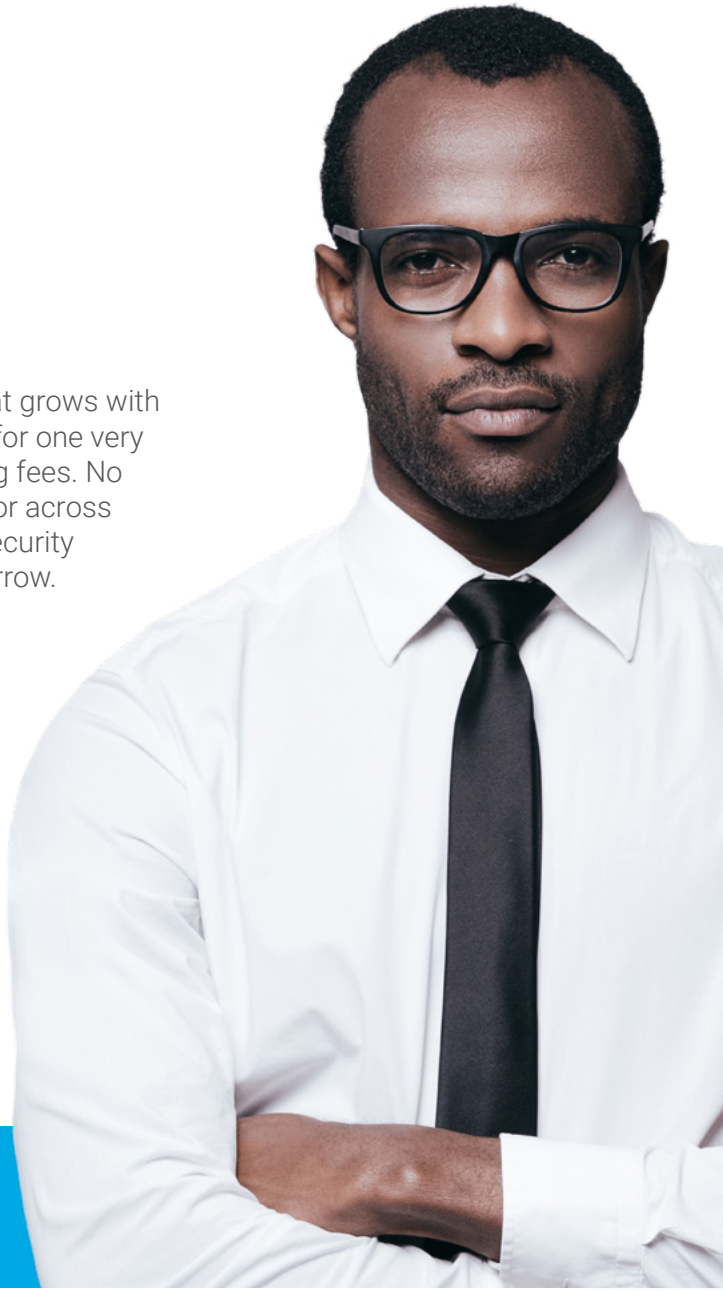
The Power of an Enterprise Platform

with the Simplicity of a Single System

Meet the new IX Series 2 . . .

The platform for enterprise security and communications that grows with you. It expands your network across multiple security layers for one very powerful solution. No proprietary servers. No annual licensing fees. No need to train your staff on multiple systems. In one building, or across worldwide campuses, the IX Series 2 covers every modern security layer you know about today — and the ones you'll need tomorrow. All with the quality and reliability you expect from Aiphone.

Maximum versatility, minimal clutter
IX-MV7-HB | Master Station



Peer-to-Peer Solution with SIP Capability

- Save money without Aiphone licensing fees or added servers
- Buy only what you need, when you need it — the system scales at your pace
- Confidently audit stations with line supervision and device check
- Convenient roaming app empowers staff and guards from anywhere onsite via WiFi
- Internal communications and multiple security layers integrated in one station
- Backwards/Forwards compatibility means your investment is protected now and in the future

Multiple Security Layers, One Powerful Solution

CONTROL

Entrances | Perimeters | Gates | Paging | Announcements

Identify Visitors at Entrances

Install stations at doors that remain open during the day, but locked at night so visitors can still be granted access.

Communicate to Public Areas

Quickly alert people to evacuate the building or create prerecorded, scheduled announcements.

Provide After-Hours Assistance

With stations located around a facility, including entrances, visitors can contact security after hours.

INTEGRATE

SIP | Access Control | VMS Systems | Network Cameras

Design the Ultimate Command Center

Using a single master station, systems can be integrated to create a powerful security operations center.

SIP Compatible Station

Easily dial to an external line, like 911, directly from stations when using a compatible SIP server.

Allow Easy Keycard Access

Stations with built-in card readers allow personnel to easily access authorized areas.

Save Money with Lower Cost of Ownership

The IX Series 2 delivers increasing value over the lifetime of your investment. It will save time and money with an overall lower cost of ownership. Plus, with Aiphone's freakish reliability, you can be confident the system will be around and functioning for years to come.

- Less equipment, lower maintenance costs
- No Aiphone licensing fees
- Products known for their unmatched reliability
- Easy to learn UI/UX
- Adaptable to changing technologies

> ***I always recommend Aiphone... well worth the investment.***
>
> ***Chuck Arredia,*** *Inside Sales, Netronix Integration*

COMMUNICATE

Between Offices | Contact Security | Connect with Staff

Call Other Offices or Buildings

Easily place calls between offices within the building or between facilities around the world.

Protect Stairwells & Outdoor Spaces

Emergency stations in wall boxes and towers can be installed to immediately contact security or 911.

Create Self-Service Kiosks

Master stations can be programmed to serve as virtual receptionists in lobbies to assist visitors.

> *I have always specified Aiphone equipment in all the years I have been doing communication systems. It is reliable, well designed, easy to install, and durable.*
>
> ***Alan Maretsky,*** *Owner, AM Services Company*

Scalable for Enterprise Growth

Buy What You Need, When You Need It

Master Stations

Security Operations Centers (SOC), Reception, Main Offices, Command Stations

- Easily answer calls and unlock doors
- Dynamic touchscreen with intuitive user interface
- Line supervision and device check alerts users when stations are offline or not functioning
- Assess situations more accurately through multiple viewing angles with picture-in-picture
- Bell scheduling and paging
- Scan monitoring

Door Stations

Exterior and Interior Entrances

- Different sizes and finishes to fit a variety of applications
- 1.2 Megapixel camera on video stations
- Edge recording capabilities
- Add 2-way communication to your ONVIF camera by linking to the station
- Audible and visual indicator for call-in and door release

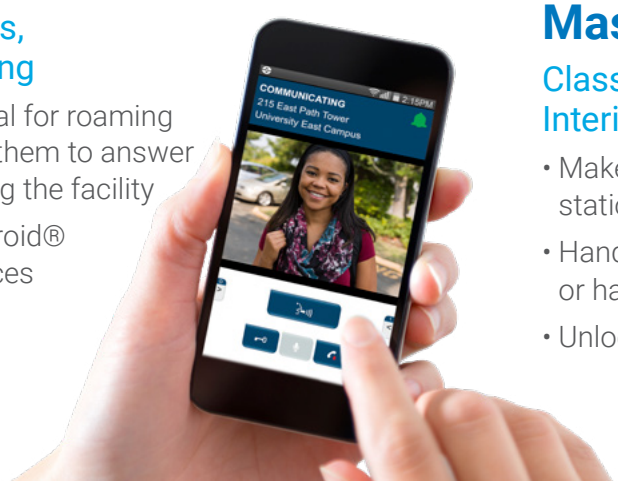
Emergency Stations

Stairwells, Parking Areas, Public Spaces

- SIP-compatible stations make it easy to call an outside number
- Both video and audio-only models are available with English or French labels
- Install in emergency towers or wall boxes
- Emergency calls can be addressed first with priority levels

WiFi Mobile App

Roaming Guards, Onsite Monitoring



- Mobile app is ideal for roaming guards, allowing them to answer calls while walking the facility
- Available for Android® and Apple® devices
- Answer calls and unlock doors

Audio Room Sub Master Stations

Classrooms, Offices, Interior Spaces

- Make direct calls to a single station or group of stations
- Hands-free communication or handset for privacy
- Unlock doors

The Freedom of Choice

Universal Network-Based Security Platform

For Businesses

The Power to Keep Moving

- Unlimited scale
- Integrate multiple security layers
- SIP compatibility
- Peer-to-peer system
- Security and communication in one
- Intercom-over-IP technology

For Schools

A Unified System

- Connect schools in a district
- District-wide communication during emergencies
- Video entry system for visitor identification and access control
- Classroom communication
- Bell scheduling

For Healthcare

Prescription for Security

- Control after hours access
- Restrict access to individual hospital wards and pharmacies
- Call between departments
- Protect visitors and staff with emergency stations around facility and garages
